DOORS TO THE WORLD

▪ Just as you like it!

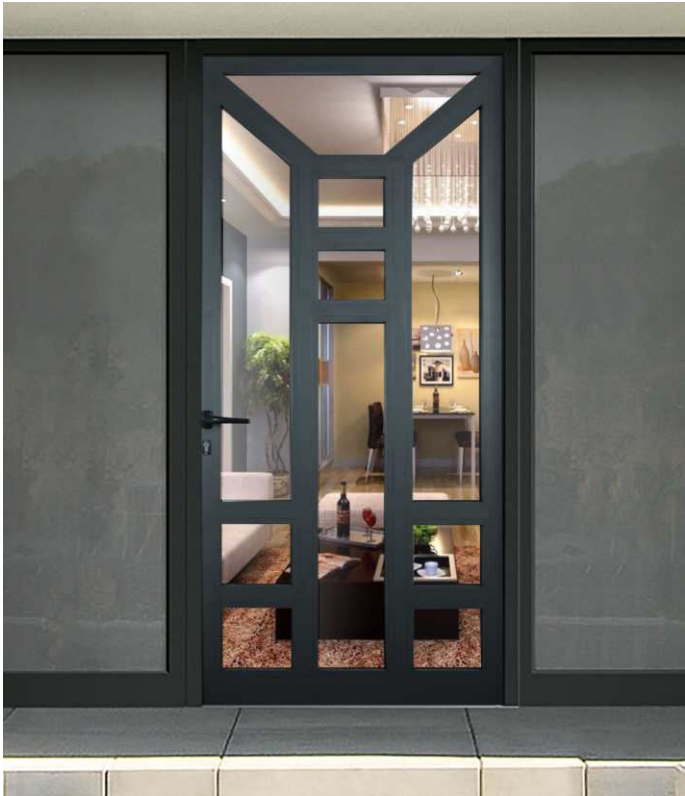

Doors are the way we express and measure our personal lifestyle. Every entrance door is a unique work of art. As a piece of furniture on the inside and as the focal point of your house design, the entrance door is an essential element of your house's architecture. That's why KALCO supports the wishes of individual customers and develops equally bold designs for all of them: from the timeless style of old buildings to the avant-garde design of modern constructions. Even when it comes to the selection of the material, there are no limits to the ideas you can have.

▪ Always one step ahead!

KALCO entrance doors set the benchmark for insulation, burglary, security, durability, resistance and soundproofing. Something which is only possible through constant further development of our already high standard of quality. Material innovations are constantly coming in to play in door construction. This makes for a ground-breaking end product. But KALCO aren't content just to meet their own tough self-inflicted quality standards. We are revolutionising work processes all the time. The close collaboration of engineers and experienced craftspeople allows for progressive ideas to be carried out. The result: an entrance door ahead of its time.

▪ With a love for detail!

Precision, a love for detail, real handcraft. KALCO places just as much value on these aspects of door production as it does on the use of exclusive materials. The highest quality construction materials that bring nature to your doorstep are grafted into windows and doors of unbeatable quality. KALCO has made it their goal to surpass standards even further and to extend the role of the market leader in precision and resistance even more. Determination the selection of materials and the constant push to offer customers a first class product strengthen this position. The closed joints, glazed panes, thermally separated profiles and ground sill, the sealing system made from permanently elastic silicone are just some examples of these efforts and make KALCO entrance doors the front runners in door manufacture.

HANDLE

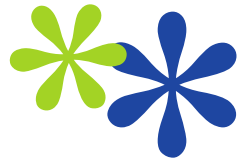

Getting a handle on something has long since been an elementary part of human life. In selecting the handle, not only do you shape the entrance to your entrance to your domestic sphere in terms of appearance, you also make it inviting to touch for you and your guests. You can choose between short handles, long handles and handles with a special feel.

INNOVATION
AT ITS BEST

SINCE
1992

हमें भारत का ब्रांड बनाने के लिए धन्यवाद।
Thank you for making us Brand of India.
